

VTF-7510

75"

75" Ultra HD 4K interactive touch screen

The Avocor™ 75" Ultra High-Definition 4K VTF touch screen includes a built-in intel quad core processor running Windows 10 operating system. This allows you to access, manage and create content, use familiar software packages, browse the Internet and gain access to the Windows store, all in a safe and familiar environment.

Avocor™ VTF series incorporates revolutionary InGlass™ touch technology that can precisely recognise the size of the object touching it, and can easily differentiate between a pen, finger, eraser or palm. Experience superb performance whilst writing with the 3mm tipped passive stylus.

The durable, sleek, professional design offers an ultra low profile 2mm bezel that is not affected by dirt and dust. There are also feature and control keys on the front of the screen, and a full range of connectivity options including room control.

Includes Avocor Note whiteboard software as standard.

For the first time enjoy a true tablet like experience on a large touch screen with price and performance optimised for education and business alike.
